DETAILED ACTION

This action is in response to amendment after final filed 2/21/2006.

Response to Arguments

Applicant's arguments, see pages 1 and 2, filed 2/21/2006, with respect to claims 5 and 17 have been fully considered and are persuasive.

Allowable Subject Matter

Claims 2-5, 12-15, and 17 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 2-5, 12-15, and 17 are neither anticipated nor made obvious by the prior art of record.

In regard to claim 2-5, the prior art fails to disclose a camera module having an array of pixel sensors and a controller, which sets the power consumption of the lighting of an I/O system in response to a signal from the camera module indicating an ambient light level, the ambient light being measured by a selected single pixel in the pixel array.

In regard to claims 12-15 and 17, the prior art fails to disclose a method for operating a device including operating a camera module to measure ambient light level, by activating a pixel sensor in an imaging array of the camera module, wherein the pixel sensors in the array have associated color filters, and the pixel sensor activated has a green filter; and measuring the ambient light using the pixel activated; and adjusting power consumption of lighting of an I/O system according to the ambient light level measured by the camera module.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
